**Why I would like to study at the program I am applying for in the school of engineering,
Kyushu University.**

I am at this moment applying for the undergraduate program in civil engineering at Kyushu University. After completing my senior high school education in Nepal, I came to Japan in October 2013. I have studied the Japanese language for one and a half years and gained a full understanding of the language. In the process, I undertook a diploma course in surveying engineering for two years in one of the vocational training school.

Afterward, I secured a job as an assistant surveyor in one of the Japanese construction company, where I worked for nine months. During the time I was working as an assistant surveyor I learned and gained a lot of experience in the process. There I also gained an interest in civil engineering, and I am working to become a committed civil engineer.

The interest in civil engineering is attributed to the interaction of the program in everyday infrastructure, from road construction to waste disposal. Hence the program will help me make a mark in life and the world. The civil engineering program will also provide for me a chance to work in an interesting and exciting environment; this is through developing projects, implementing the projects and maintaining them.

The civil engineering program also involves a lot of practical education, and despite my poor grades I always perform well in practical education. Throughout the process in the program, I will attain practical skills and experience; this is due to the availability of appropriate resources in Kyushu University and the program of industrial placement in the process of learning.

In completion of the civil engineering program, there is a lot of postgraduate courses option to advance my education. This is all in the order I attain my childhood dream of becoming a civil engineer. Also, the program will create a chance for me to enter into an effective graduate scheme which offers to civil engineering graduates a lot of structured programs on offer. They provide an opportunity for the graduates to gain experience, make the employable individuals and may offer permanent employment and roles.

A degree in the program of civil engineering from Kyushu University creates more employment opportunities. This is through creating more job options. Hence an individual has many different

roles to pursue. The jobs are accompanied by a good and sufficient salary that will improve my standards of living.

Besides, the program will also help me acquire valuable knowledge and transferable skills. The skills and knowledge can be used in other field and professions such as decision making, analysis and problem-solving. The study of civil engineering also creates chances for involvement in other areas and interest such as engineering equipment sales, political career, and business communications. Therefore, studying the civil engineering program is crucial to me.

Lastly, Kyushu University is equipped with appropriate resources for the study of civil engineering. This is through the use of advanced technology in their studies and well-trained lecturers making studying of the program efficient and effective. Besides, they are equipped with programs to ensure one gains experience in the learning process. Therefore, the need to study civil engineering program at Kyushu University.
